**Venue: EPCO Auditorium, Paryavaran Parisar,
E.5, Arera Colony, Bhopal.**

ACHMM-India Chapter (www.Achmmindiachapter.org)

ACHMM-IndiaChapter is affiliated to the academy of certified, hazardous materials manager (ACHMM) situated in Rockville Pike, Bethesda, Maryland USA (now alliance material professionals, AHMP). AHMP is a professional organization with a membership of about 4000 certified hazardous material managers (CHMMs) represented by 56 chapters in 37 states. The membership association is focused on its vision of becoming the recognized global leader and resource for hazardous material professionals. It provides the platform to its members to exchange information through group interactions, courses and meetings on issues and problems related to environment, occupational and industrial hazards.

About EPCO (ENVIRONMENTAL PLANNING & COORDINATION ORGANIZATION)

The process-oriented project is envisaged to strengthen and reposition EPCO in the environment sector, by building its capacity so that it is able to advise the state government on environmental matters and the contemporary advances around the globe. MP has a myriad of resources, rich forests, plenty of river networks, enormous biodiversity, rich sources of minerals. These resources need to be put to judicious use. This fact coupled with low levels of development, relatively appreciable level of poverty, Ranges of environmental problems like droughts, and floods and low financial investments has hampered the speed of development in the state. The specificities of Madhya Pradesh dictate that EPCO makes a strategic shift to focus on environment issues that confront the poor in the rural and urban areas.

About MPPCB (MADHYA PRADESH POLLUTION CONTROL BOARD)

Prevention is better than cure and this is indeed true in case of environmental pollution. A strong need is felt today, on a global basis, to conserve the natural resources like air, water and soil to sustain the quality of environment for future generations and only a judicious use of these natural resources can prevent the environment degradation and its ill effects on human health due to pollution. Keeping this as a pious objective, to save the environment, in the forefront, the Govt. of India has made provisions in the constitution for the protection and improvement of environment to take care of the health & safety of people as well as of flora and fauna. The Water (Prevention and Control of Pollution) Act, 1974 was the first enactment by the Parliament in this direction, followed by Water (Prevention and Control of Pollution) Cess Act, 1977, Air (Prevention and Control of Pollution) Act, 1981, Environment (Protection) Act, 1986 and Public Liability Insurance Act, 1991. Number of other rules have also been framed and passed by the Parliament under Environment (Protection) Act, 1986.

About DMI (DISASTER MANAGEMENT INSTITUTE)

The principal objective of the institute is to evolve techniques for and enhance competence in prevention, preparedness, mitigation and management of natural as well as industrial disasters. Towards this end, the institute caters for the professional development and disaster management requirements of the government as well as public and private sectors. The institute offers both training courses and consultancy services on various facets of mitigation and management of disasters. The ultimate objective of the Institute is to 'prevent or mitigate the consequences of disasters and thereby benefit the general community'. The Institute is one of the inspecting agencies of certification to DMP of mid and down stream Oil & Gas companies of the country.

About JURIS CONSULTUS

The Firm established as a full service one stop firm catering to all the legal needs of the corporate clients in Central India, being based in the State of Madhya Pradesh with our Corporate Head Office being the city of Bhopal we have our local branch offices and associate liaison offices all over the states of Madhya Pradesh and Chhattisgarh, and business tie ups with legal and financial experts in the states of Rajasthan and Uttar Pradesh. Principal and Owner,
KGS Environmental Consulting, Inc
Cincinnati, Ohio, USA

Lorenz R. Spangler, CHMM
Manager,
Logistics Policy and Integrated Support Department
Sandia National Laboratories
Albuquerque, New Mexico, USA

Brandan A. Borgias, Ph.D.,
IT Systems Manager
SVL Analytical Laboratory
Kellogg, Idaho, USA

Larry L Lockrem, M.S.
Director, Technology Development,
Center for Laboratory Sciences
RJ Lee Group
Pasco, Washington, USA

Sandra L Cole, M.S., CHMM, REP
Owner and President, Cole Environmental, Inc
St. Louis, Missouri, USA

Robert D. Binovi, Ph.D., PE, CHMM
Project Manager
Prudent Technologies, Inc
San Antonio, Texas, USA

Robin K. Spencer, CHMM, REA
Principal Environmental Consultant
Spencer Environmental, LLC
Orinda, California, USA

Topics Covered:

- Understanding Hazardous Waste Generation in India & Key Issues Related to Hazardous Waste
- Laws Governing Hazardous Waste in India
- The Scientific Approach to Hazardous Waste
- Hazardous Waste Management And Emerging Issues
- Preventing Hazardous Waste Generation
- Hazardous Waste Management Processes, Treatment Technologies, and Recovery
- Establishment & Management of Hazardous Waste Disposal Sites, Common Effluent Treatments, Facilities, and Landfills
- Environmental Impact Assessment and Risk Assessment
- Hazardous Materials- Safe Handling and Emergency Preparedness
- Safe Transportation of Hazardous Materials
- US Perspective on Disaster Preparedness and Response
- Municipal Authorities and Issues Related to Hazardous Waste
- Electronic Waste & Other new sources of Hazardous Waste Generation and their Management
- Potential Impact of Nuclear Waste Activities on Population Centers
- US Perspective on Environmental Justice relating to Hazardous Waste
- Drafting of A resolution of Best Management Practices (BMPs) in Hazardous Materials, Management and Risk Management which will be sent to the Government for implementing policy reforms.

The Above Courses will discuss:

Principles, Facility Management Assessments, Acts, Rules, Regulations, Safety, Audit, Guidelines, Manifests, Investigation and Reporting procedures and Protocols (With Reference to Indian Context).
